

Air India: 5 ways the airline is transforming your travel experience - Part I

As Air India advances through its transformation journey, here is a sneak peek into how the airline has been progressively elevating your travel experience. In Part I of this series, we touch upon five key inflight facets - from onboard Wi-Fi to luxury amenity kits.

Onboard Wi-Fi at 35,000 feet

Enjoy Wi-Fi on select flights with Air India, the first Indian carrier to offer in-flight internet on domestic routes. Stay connected with loved ones, browse the web, or access social media seamlessly while soaring at 35,000 feet.

Vista Stream - Air India's wireless in-flight entertainment

Stream an extensive collection of 1800 hours of Bollywood, Hollywood, TV shows, and more, directly to your device. Vista Stream's compatibility with iOS, Android, Windows, and macOS ensures you remain entertained on several domestic and international routes.

An upgraded experience on single-aisle aircraft

Discover the exclusivity of Premium Economy on more than eighty aircraft deployed on domestic and international routes. This entails a dedicated, upscale cabin with extra legroom, enhanced meals, priority services on ground, and more. Moreover, a significant refurbishment of 27 legacy A320 aircraft has been initiated to further enhance your journey with upgraded cabins, seats, new upholstery and carpets.

Bespoke amenity kits onboard

Delight in plush amenity kits by Ferragamo and TUMI on our long-haul and select medium-haul flights. From indulgent skincare to comfort essentials, every detail is thoughtfully curated to make your journey more comfortable.

The flagship A350 experience

Experience India's first Airbus A350 featuring suite-style Business Class, the all-new Premium Economy, and next-gen Economy cabin. Savour a sumptuous dining experience onboard and delight in premium amenity kits, flying aboard Air India's flagship A350 now operating between Delhi and London Heathrow, New York, and Newark.

Stay tuned for Part II
